WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC). If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT PROCEDURES
Students may only enroll in one (1) First-Year Seminar OR (1) First-Year Launch during their time at UNC. Please note that First-Year Seminars do not have waitlists.

TITLE: Caribbean Feminist and Queer Life Writing

IDEAS IN ACTION GEN EDS: FC-GLOBAL or FC-POWER

COURSE DESCRIPTION
From Audre Lorde¿s ¿Your silence will not protect you¿ to June Jordan¿s ¿We are the one we have been waiting for,¿ Caribbean feminist and queer writers have generated some of our most iconic and inspiring visions of justice, community-building, and collective empowerment. Many of these prolific thinkers write from their lived experiences, detailing how their intimate encounters with historical, social, and political phenomena shape their political visions. In this seminar, we will read a wide range of essays, speeches, memoirs, interviews, and letters by Afro-Caribbean feminist and queer writers in order to explore the importance of life writing as a vital genre of personal and collective transformation in the African diaspora and beyond. We will ask: What role

TITLE: Asian Americans in the U.S. South

IDEAS IN ACTION GEN EDS: FC-POWER

COURSE DESCRIPTION
In this seminar, we will study the history, cultures, and documentation of Asian Americans in the U.S. South, from the 19th century to present. Drawing on a range of sources, from oral histories and poetry to documentary film and short stories, we will examine how Asian Americans have grappled with identity, belonging and home in the South. In our studies together, we will consider how Asian Americans have navigated national and regional histories of slavery and segregation, immigration exclusion, and the shifting borderlands of the American South and the Global South. With a focus towards working with community and institutional archives, we will explore how to research, discuss, write, and create with the stories of Asian Americans throughout the region, and across

Class Equivalents: AMST 89/89H

WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC). If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT PROCEDURES
Students may only enroll in one (1) First-Year Seminar OR (1) First-Year Launch during their time at UNC. Please note that First-Year Seminars do not have waitlists.

This course is an advanced undergraduate seminar/food-writing workshop in which, at the end of the semester, students produce an actual cookbook: A work of original research including four well-researched and kitchen-tested recipes, an introduction of significant length explaining the theme of the project, and photographs/illustrations/other visual representations of the dishes and also of other relevant material (such as, say, archival photographs). Each recipe will have a headnote featuring research information about each dish. Material will be gathered via a variety of fieldwork methods introduced in class (examples: interviews with authorities on the student's chosen subject and/or archival explorations). Students will meet as a class once a week for a long seminar session, during which the students will work with the instructor, their peers, and a university librarian on refining the mission of their individual books, developing fieldwork and research techniques for both the recipes and the narrative, discuss techniques for recipe development and testing, and practice food writing techniques. Must have access to a working kitchen. Instructor permission required.

WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC). If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT PROCEDURES
Students may only enroll in one (1) First-Year Seminar OR (1) First-Year Launch during their time at UNC. Please note that First-Year Seminars do not have waitlists.

TITLE: A History of the World in 12 Objects

IDEAS IN ACTION GEN EDS: FC-PAST, FC-KNOWING

COURSE DESCRIPTION
How did we get here? What were the major transformations in human history that created our world? What impacts have these changes made on the natural world and on us? What can we learn from this long history? This class is about objects and social change: meaning that we will use human-made objects ¿ artifacts ¿ as a way to understand the long and complex history of our species. We use the concept of `object biography¿ to do this ¿ you will each get a chance to produce an object biography of your own and to think critically about how we understand and represent material culture in museum displays.

TITLE: Canine Cultures

COURSE DESCRIPTION
What is a dog? A companion? A helper in activities as diverse as hunting, shepherding, de-mining, and policing? How did dogs evolve from wolves to become ¿man¿s best friend?¿ How do the ways dogs know and sense the world differ from the ways humans do? How do dogs without homes relate to humans? This course answers such questions by investigating relations between humans and canines¿mainly dogs; some foxes and wolves--across time and space. We will discover how movements of people, images, and goods spread around the world not only specific breeds but ideas about what dogs are good for and how dogs should be treated. Drawing on scholarly articles, news reports, films, statues, and field observations, we¿ll explore how human value systems and politics have shaped dog lives and deaths¿and in turn how dogs have shaped human lives.

TITLE: Walking in the World: The Anthropology of Moving, Knowing, and Creating

IDEAS IN ACTION GEN EDS: FC-KNOWING

COURSE DESCRIPTION
We learn about the world as we move through it. In moving, we change the world around us and we are transformed by our experiences. However, we are not free to move wherever we wish. We live with boundaries, some only dimly understood. And yet, sometimes we come together to challenge these boundaries and struggle to create something new.

In this class, students will learn how anthropologists create research projects to explore these questions. While our focus will be on cultural

Environment, Population, & Wellbeing

Concern over the relationship between population and environment abounds, but the most salient research and discussion in environmental studies has focused on one aspect of the relationship --human impact on the environment. In this seminar, we will be concerned with the other side of the relationship as well -- how environmental characteristics (certainly the physical and biotic environments, but also the social/economic/political environments as they interact with the above) affect population characteristics and dynamics. These two "directional arrows" (population ¿ environment, and environment ¿ population) are of course ultimately inseparable. We will examine not only how environmental characteristics affect human population dynamics (reproduction, family formation, movement, survival), but also with how responses to those environmental characteristics -- through mitigation or coping -- in turn affect the

Engineers help to design and build solutions to the world's problems. This course will explore some of the fundamental skills and tools in engineering. You will get experience using engineering tools, and you will also develop a mindset so that you can "learn how to learn" because technology changes rapidly and the tools that you use today may be obsolete in 20 years. There will be an emphasis on developing strong professional skills, including work in a group setting and effectively communicating your efforts.

In addition, a goal of this class is to help you develop an entrepreneurial mindset so that you will understand the bigger picture. For example, while it may be easy to develop an engineering solution to a problem, what are the economic and ethical considerations of various solutions? These concepts are important to help engineers build a better world.

This will be an "active learning" class in which we spend much of our class time working. For example, we will write computer programs to model and simulate

Design thinking is a popular buzz term in this age of Kickstarter, instant turnaround, and short time-to-market. But what is design thinking really all about? In many ways, it is a process that most of us were quite familiar with in our preschool years. Observe an opportunity. Take an action. Assess the results. Laugh at the failures. Repeat. Design is not just for artists and engineers - we are all designers!

But how do we get back to that pure form of design thought? In this class we will explore design through active making, discussion, presentation, and self-evaluation. Starting with the most basic of materials, we will exercise our latent creativity muscles and exorcise the constrained thinking and other obstacles engrained in us by "traditional" education. In this class, "failure" is an important concept that will be embraced and even celebrated. Science, entrepreneurship, and life itself is a process of try and try again. We must accept and learn from failure in order for "try" to become "do" and for "do" to lead to success.

How can you measure temperature, pH, heart rate, movement, distance or anything else in the physical world? First, you need a sensor! In this class, we will learn how to analyze, design, and build systems for the entire sensor to measurement process. We will use a variety of sensors that measure physical and environmental parameters. We will model these sensors and understand how they work and interact with electrical circuits. We will learn the basics of circuit design and analysis so that we can amplify and ¿clean up¿ the signals with filters. Finally, we will learn how to acquire these signals to a computer through data acquisition hardware and LabView software.

Do you have an entrepreneurial idea and you would like to make a prototype to turn your idea into reality? Or do you want to experience the design and making process? In this class, you will go through this process for a semester-long project. The final outcome will be a prototype that meets an entrepreneurial need.

The pre-requisite is APPL110 or permission from the instructor for those who have significant experience in the BeAM Makerspace of something equivalent. Orientation in the BeAM Makerspace is required. Students from any major are welcome to take this class.

You do not need to have an entrepreneurial idea before taking this class. You will work in groups to identify entrepreneurial ideas, which could emerge from discussions with people in the UNC community, local community, or around the country. From these ideas, you will choose a topic for your semester project, and then start working with your group on different designs, getting feedback throughout the process. By the end of the semester, you will fabricate a

This course introduces principles of optical system design, covering a broad variety of imaging and microscopy instruments. The material will include computational methods for optical signal processing and basic principles governing light-matter interactions. The course will include theory and hands-on experience to implement and test methods. We will discuss recent publications and state-of-the-art optical systems which are task-driven, controlled by computers, tailored to specific applications, and optimized to monitor or manipulate complex systems.

An ideal research experience provides students with practical experience in a research lab, performing work that is relevant to their UNC education. The research internship should develop and enhance the students¿ professional skill sets and involve experiences that allow students to have responsibility for results that are of value to the research laboratory.

Research interns are mentored by a faculty member and other members of their lab. The implementation, and evaluation of the internship are a collaborative effort between the student and their research mentor. If the research mentor is not a member of the APS faculty, then the students should also have an APS faculty advisor. Oversight is also provided by the APS Research and Internship Coordinator and/or Director of Undergraduate Studies (the same person may be serving both of these roles). Internships are typically 150 hours in duration (10 hours per week during an academic semester). However, internship time frames can be flexible to match the needs and interest of the student with the opportunities offered by the research lab.

WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC). If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT PROCEDURES
Students may only enroll in one (1) First-Year Seminar OR (1) First-Year Launch during their time at UNC. Please note that First-Year Seminars and First-Year Launches do not have waitlists.

WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC). If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT PROCEDURES
Students may only enroll in one (1) First-Year Seminar OR (1) First-Year Launch during their time at UNC. Please note that First-Year Seminars and First-Year Launches do not have waitlists.

ARTS 105H.001 | Basic Photography
MW, 8:00 am - 10:45 am. Instructor(s): Martin Wannam. Enrollment = 15.
In ARTS 105H Basic Photography you will be introduced to the basic techniques of digital photography. Both technical and conceptual applications of image-making will be explored. This course seeks to develop an understanding of the mechanics, visual language, and history of the photographic medium. Specifically, we will work with digital photographic practices, learning the fundamentals of DSLR cameras, Adobe editing software such as Photoshop and Bridge, inkjet printing, and basic digital workflow and file management. In conjunction with your studio practice, you will also learn about the medium¿s rich history.

Assignments will be supplemented with readings, films, library, and museum visits. Over the course of the semester, you will be exposed to a variety of examples of historical and contemporary photography. In the classroom you will be exposed to technical demonstrations, lectures, discussions, critiques,

Drawing in Virtual Reality.

Students should have taken ARTS 104 prior to enrolling in this class.

This course is an exploration of digital processes in drawing with an emphasis in Virtual Reality. The class gives students the opportunity to create immersive creations with the Oculus Quest 2 headsets. Students learn to use foundational drawing techniques using the VR platform and explore the artistic and critical potential of VR and other digital processes. Class sessions will consist of technical workshops and ¿hands-on¿ projects developing Virtual Reality environments as well as class discussions and critiques of student work. Students will also research artists who utilize drawing as a medium through new technologies, as well as the history + cultural topics that influence the direction of traditional mediums. While no prior experience in VR technologies is required, this is a research course, with a certain level of independent work and exploration beyond the introductory workshops presented in

17-NOV-2023 UG Studio Art Majors 1 15

The summer version of this class features overnight backpacking and camping. However, during the regular semesters (fall or spring), instead of overnight expeditions, the course is structured around a comprehensive series of lectures and discussions covering the history of walking and its role as an artistic practice.

ARTS 390 Sculpture Garden: Holograms, Prototypes and Dioramas.
Navigating the terrain between history, landscape and social justice, students will produce a large-scale installation that will feature an app based, guided walking tour, a scale model/diorama of UNC campus and several Pepper¿s Ghosts holograms. Students will also work with several computer programs (Google Earth, Equator, etc) and Sculpture making tools (Shopbot and Laser Cutter) to generate 3D models of the surrounding landscape, forming the anchor point for the installation. This class will culminate with a public presentation of the faculty-led work as part of the Alumni Sculpture Garden program.

TITLE: The Samurai: Gender and Power in Japanese History and Culture

IDEAS IN ACTION GEN EDS: FC-PAST

COURSE DESCRIPTION
This course examines the history of the samurai, the hereditary, elite warrior population that emerged as a new social and political force in Japan in the 12th century and which ruled, largely unchallenged, until the Meiji Restoration of 1868. In the modern era, frequent reinventions situated the samurai as core to understanding ¿traditional¿ Japan, as well as vague and aphoristic notions of the Japanese spirit and Japanese masculinity. More recently, the samurai has emerged as a global icon in Japanese popular culture, and has become a figure in the comics, animation, and video games that make Japan a powerhouse on the stage of our interconnected consumer culture. Using historical methods, cultural studies theories, and gender studies theories, we will

TITLE: Women and Performance in Transnational Asia

IDEAS IN ACTION GEN EDS: FC-AESTH, FC-GLOBAL

COURSE DESCRIPTION
This course will examine various performances (live performance, media performance, dance, singing and other forms of art making) produced by women (broadly defined) in transnational Asia. The Asia imagined in this class is global and diasporic, thus, trans-national. These women¿s performances speak of their feminist, post-colonial, and anti-hegemonic agenda; reveal various nations¿ struggle to globalize; and reflect how the category of ¿Asian,¿ intersected with gender, continues to evolve. This course will engage with these performance deeply and creatively and respond to these strong voices of the artists with our critical analysis.

Attributes: PL- Physical and Life Science, IDEA - Natural Scientific Investigation, IDEA - FY - First Year Seminar

WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC). If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT PROCEDURES
Students may only enroll in one (1) First-Year Seminar OR (1) First-Year Launch during their time at UNC. Please note that First-Year Seminars and First-Year Launches do not have waitlists.

This research-based lab introduces students to the process of science through collaboration on a research project, learning relevant techniques and scientific skills focusing on symbiosis in sea anemones.

This lab can be taken in place of BIOL 101L and when taken with BIOL 101, counts as Communication Intensive credit. Counts as EE.

First Year Students ONLY.

FIRST-YEAR LAUNCH SECTION

WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC). If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT PROCEDURES
Students may only enroll in one (1) First-Year Seminar OR (1) First-Year Launch during their time at UNC. Please note that First-Year Seminars and

If you are not able to register on your own (for whatever reason = no pre-reqs, etc), plan to attend the first lecture in the spring. Add your name to the class signup sheet for students not registered that will be available in class the first day. We enroll as many students as possible that day, giving priority to transfer students and students that are approaching graduation.

BIOL 214H.001 | Mathematics of Evolutionary Biology
TR, 9:30 am - 10: 45 am. Instructor(s): Maria Servedio. Enrollment = 24.
This course teaches students how scientists use mathematics to approach questions in evolutionary biology and ecology. Students learn both biological and mathematical concepts, taught using an array of pedagogical approaches. There are two group projects over the course of the semester, one involving the development of an original mathematical model.

PREREQUISITES: BIOL 101 & MATH 231. PERMISSION OF INSTRUCTOR REQUIRED FOR STUDENTS LACKING THE PREREQUISITES.

Dr. Servedio's research centers on determining the evolutionary mechanisms that produce and maintain biodiversity. She is currently concentrating on the evolution of species-specific mate choice in animals, on the evolutionary effects of learning, and on the evolution of male mate choice. Dr. Servedio

BIOL 220H.001 | Molecular Genetics
TR, 9:30 am - 10: 45 am. Instructor(s): Kerry Bloom. Enrollment = 24.
To provide you with the core principles of genetics and molecular biology.
The lecture/discussion sessions and the book will provide the basic content. We will take an historical approach at times to discuss seminal experiments and how they were done. We will examine the basic ¿rules¿ of genetics and molecular biology. After this class you will be prepared to do research in a lab on campus and to build upon this content with upper-level genetics courses and/or molecular biology courses.
Skills --
· Build hypotheses to answer a specific scientific question, design an experiment
using an appropriate technique/assay to answer the question, predict and analyze the results of the experiment
· Give examples of how advances in genetics and molecular biology, from the discovery of DNA¿s structure to the sequencing of individual genomes, have

BIOL 240H.001 | Cell Biology
TR, 11:00 am - 12:15 pm. Instructor(s): Bob Goldstein / Amy Maddox. Enrollment = 24.
This course will take you to the next level of understanding how cells work. You will learn how cell components function, and how cells accomplish dynamic processes including cell division, migration, and communication. These topics are important for development, homeostasis, and avoiding a wide range of human diseases. We consider cell biology interesting because it involves active materials, signal integration, and the struggle to create and maintain order in an increasingly entropic world. The course will also help build your understanding of how scientific knowledge is amassed through creative design of scientific experiments. You will learn to think critically about how discoveries are made, and you will imagine and propose how future discoveries might be made.

PERMISSION OF INSTRUCTOR REQUIRED. CONTACT DR. GOLDSTEIN AT bobg@email.unc.edu

---

College of Arts & Sciences - Biology - Subject: BIOLOGY

Subject	Catalog Nbr	Section	Class Nbr	Course Title	Component	Units	Topics
BIOL	252	001	2530	FUNDAMENTALS OF HUMAN A AND P	Lecture (In Person On Campus Learners)	3	A

Seats reserved for NURS. PHARM. NUTR. RADI. APPL. DHYG. BMEU. NOT open to first year students.
If BIOL 252 is full, please sign up for the waitlist at this site: https://forms.gle/H3hfpUtq1UvhcP5A7
If a space comes open, the Biology Registrar will register/notify you.

Bldg: Genome Sciences Bui **Room:** G200 **Days:** MWF **Time:** 10:10 - 11:00
TA 100 **Instructor:** OTT,LAURA E

Honors Carolina students can register themselves for SPRING 2024 online when their registration appointment begins.
Non-Honors students will be eligible to enroll beginning November 17 during open enrollment.
BIOL 255H.001 | Evolution of Extraordinary Adaptations
MW, 10:10 am - 12:20 pm. Instructor(s): Christopher Willett. Enrollment = 18.
Of course, you know that the Venus flytrap catches and digests insects, did you also know that it is native almost entirely to North Carolina? Extraordinary adaptations can be found in numerous other organisms as well. In class, in addition to studies on the Venus flytraps, we will also look at the exceptional environmental stress tolerance of a tidepool copepod that Dr. Willett¿s lab has worked on in his laboratory. This copepod can survive freezing, high salinities, low pH, and anoxic conditions and shows different patterns of adaptation to these stressors across populations.

This class will conduct publishable research in evolution and ecology by doing actual science on the Venus flytrap and tidepool copepod. We will attempt to answer unknown questions about adaptations in these systems by using techniques such as high-speed video analysis, environmental manipulation, and physiological assays. Through this course students will be totally immersed in how research is done. Students will be taught how to generate hypotheses,

BIOL	395	001	2486	UNDERGRADUATE BIOLOGY RESEARCH	Lecture (In Person On Campus Learners)	1 - 3	A

BIOL 395/395H/495 will only be accepting an online-application form for undergraduate research. You will apply online, get a copy after submission, and share the copy with your research mentor and biology sponsor (when applicable).

Here is the online form:
https://forms.gle/qvdBoW26cbyfcQhGA

Please note- before you apply you need to make sure that you found a lab and a faculty that will mentor you (principal instructor or PI). If that faculty member is outside the biology department you also need to find a biology faculty member that will serve as the biology faculty sponsor, interacting with you and the faculty mentor (the PI) to make sure everything works well during the semester.

BIOL 395 028 4780 UNDERGRADUATE BIOLOGY RESEARCH Lecture 1 - 3 A
(In Person On Campus Learners)

BIOL 395/395H/495 will only be accepting an online-application form for undergraduate research. You will apply online, get a copy after submission, and share the copy with your research mentor and biology sponsor (when applicable).

Here is the online form:
https://forms.gle/qvdBoW26cbyfcQhGA

Please note- before you apply you need to make sure that you found a lab and a faculty that will mentor you (principal instructor or PI). If that faculty member is outside the biology department you also need to find a biology faculty member that will serve as the biology faculty sponsor, interacting with you and the faculty mentor (the PI) to make sure everything works well during the semester.

BIOL	395H	001	2491	UNDERGRADUATE BIOLOGY RESEARCH	Lecture (In Person On Campus Learners)	1 - 3	A

The purpose of BIOL 395H is to provide honors students with independent research experience, while working in a research lab on a question of current biological interest. Under the supervision of a faculty member, and with contribution of research postdoctoral fellows, students will learn more than just basic research techniques. They will learn how to start to think as scientists, raising hypotheses and finding ways to test them in an empirical manner. In addition to the research performed in the lab, honors students will meet with each other on a weekly basis, discuss their research and develop their scientific thinking through reading and discussing primary scientific literature.

FOR BIOLOGY MAJORS ONLY. DEPARTMENT OF BIOLOGY PERMISSION REQUIRED

BIOL 395H may be taken for no more than six graded academic credits. Three to five credit hours of research may be counted as one lecture course toward fulfillment of major requirements; six credit hours may be counted as one lecture course with laboratory toward fulfillment of major requirements.
BIOL 395/395H/495 will only be accepting an online-application form for undergraduate research. You will apply online, get a copy after submission, and share the copy with your research mentor and biology sponsor (when applicable).

BIOL 436H.001 | Plant Genetics, Development, and Biotechnology
TR, 11:00 am - 12:15 pm. Instructor(s): Jason Reed. Enrollment = 35.
Recent advances in plant molecular biology, genetics, development, and biotechnology, and their potential relevance to agriculture. The course will include lectures, reading and discussions of papers from the primary literature, and student presentations.
Prerequisites, BIOL 202; or BIOL 271; or BIOL 103, BIOL 104, and BIOL 220; or permission of the instructor for students lacking the prerequisites.

The course will focus on several themes that will illustrate methodological approaches and intellectual questions in plant biology. These themes may differ

in different years. Each theme will be covered over several class periods (2-3 weeks). We will intersperse lectures and more focused class discussions centered on papers from the primary scientific literature reporting research findings. Students will:

BIOL 490 001 5692 ADVANCED TOPICS IN BIOLOGY Lecture 3 A
(In Person On Campus Learners)

Course Goals: A major goal is to acquaint you with evidence of the past (deep) history of life and the interaction of life, earth processes, and climate, using selected events from the 3.5 billion year existence of life on Earth, as evidenced by fossils in combination with other approaches, such as isotopic geochemistry, genomics, development, etc. Part of the focus will be on how does one interpret the fossil record, and what other lines of evidence aid in that. Over 90% of all species that ever lived are extinct and while fossils represent only a small percentage of all past life, they provide many useful insights.

BIOL 495 001 4195 UNDERGRAD BIOLOGY RESEARCH Lecture 1 - 3 A
(In Person On Campus Learners)

BIOL 395/395H/495 will only be accepting an online-application form for undergraduate research. You will apply online, get a copy after submission, and share the copy with your research mentor and biology sponsor (when applicable).

Here is the online form:
https://forms.gle/qvdBoW26cbyfcQhGA

Please note- before you apply you need to make sure that you found a lab and a faculty that will mentor you (principal instructor or PI). If that faculty member is outside the biology department you also need to find a biology faculty member that will serve as the biology faculty sponsor, interacting with you and the faculty mentor (the PI) to make sure everything works well during the semester.

BIOL 495 015 4991 UNDERGRAD BIOLOGY RESEARCH Lecture 1 - 3 A
(In Person On Campus Learners)

BIOL 395/395H/495 will only be accepting an online-application form for undergraduate research. You will apply online, get a copy after submission, and share the copy with your research mentor and biology sponsor (when applicable).

Here is the online form:
https://forms.gle/qvdBoW26cbyfcQhGA

Please note- before you apply you need to make sure that you found a lab and a faculty that will mentor you (principal instructor or PI). If that faculty member is outside the biology department you also need to find a biology faculty member that will serve as the biology faculty sponsor, interacting with you and the faculty mentor (the PI) to make sure everything works well during the semester.

BIOL 495 065 5009 UNDERGRAD BIOLOGY RESEARCH Lecture 1 - 3 A
(In Person On Campus Learners)

BIOL 395/395H/495 will only be accepting an online-application form for undergraduate research. You will apply online, get a copy after submission, and share the copy with your research mentor and biology sponsor (when applicable).

Here is the online form:
https://forms.gle/qvdBoW26cbyfcQhGA

Please note- before you apply you need to make sure that you found a lab and a faculty that will mentor you (principal instructor or PI). If that faculty member is outside the biology department you also need to find a biology faculty member that will serve as the biology faculty sponsor, interacting with you and the faculty mentor (the PI) to make sure everything works well during the semester.

Please note- before you apply you need to make sure that you found a lab and a faculty that will mentor you (principal instructor or PI). If that faculty member is outside the biology department you also need to find a biology faculty member that will serve as the biology faculty sponsor, interacting with you and the faculty mentor (the PI) to make sure everything works well during the semester.

This goal of this course is to familiarize students with the theory, origins, and practice of genome engineering technologies and their applications in medicine and industry. In addition, we will consider the challenges and impacts to society and the ethical choices these technologies create. The course will cover primary literature frequently and evaluate the scientific data in these publications. The course will also include a student led small group project that aims to educate about genome editing by creating a multi-media component.

WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC). If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT PROCEDURES
Students may only enroll in one (1) First-Year Seminar OR (1) First-Year Launch during their time at UNC. Please note that First-Year Seminars and First-Year Launches do not have waitlists.

CHEM 241H.001 | Modern Analytical Methods for Separation and Characterization
TR, 12:30 pm - 1:45 pm. Instructor(s): Erin Baker Enrollment = 20.
Analytical separations, chromatographic methods, spectrophotometry, acid-base equilibria and titrations, bioanalysis, immunoassays.

Qualitative and quantitative chemical measurements are essential to understand the chemical and physical changes happening around us. This course will focus on the fundamental of modern analytical methods as applied to medical diagnostics and point-of-use immunoassays. In particular, we will discuss the importance of (1) sample preparation, analytical separations, and chromatography prior to analyses, (2) the use of spectrophotometry and electrochemistry to quantify the component interest in a mixture, and (3) the experimental design considerations to determine the ability to quantify that component of interest correctly.

CHEM 261H.001 | Honors Organic Chemistry I
TR, 2:00 pm - 3:15 pm. Instructor(s): Todd Austell. Enrollment = 20.
Molecular structure of organic compounds, and the correlation between structure and reactivity including the theoretical basis for these relationships; classification of "reaction types" exhibited by organic molecules using as examples molecules of biological importance. This course will be similar to CHEM 261 with a greater emphasis on class discussion, problem-solving, and the investigation of organic chemistry research at UNC.

PREREQUISITES: CHEM 102 OR CHEM 102H. GPA OF 3.600 OR HIGHER.
PERMISSION OF INSTRUCTOR REQUIRED. EMAIL chemus@unc.edu.

NOTE: Honors Carolina students register online when their registration appointment begins. Wait listing begins December 14. At that time, submit a wait list request at honorscarolina.unc.edu/waitlist. Non-honors students wishing to enroll should submit a wait list request at honorscarolina.unc.edu/waitlist between December 14 and January 13.

CHEM 262 001 2024 INTRO ORG CHEM II Lecture 3 A
(In Person On Campus Learners)
CHEM 262 has an enforced prerequisite. Students must have taken CHEM261 or 261H with a C- or better.

Spring 2024 Chem 262 Common Exams from 5:30 pm - 8:00 pm on the following dates:
Monday, 2/19/24
Monday, 3/25/24
Monday, 4/22/24

CHEM 430H.001 | Introduction to Biological Chemistry
TR, 11:00 am - 12:15 pm. Instructor(s): Brian Hogan. Enrollment = 30.
Dynamic examination of the principles of biochemistry, from macromolecules through enzyme function and catalysis, and into the primary metabolic pathways that generate cellular energy. This course will be an interactive combination of lecture, group based guided inquiry along with presentations from students and deeper dives into topics of mutual interest to course participants. The goal of the course is to provide a detailed foundation in biochemistry and to teach critical thinking skills focused on understanding and challenging primary biochemical data. Students who enroll in this course are typically heading to graduate or professional school in this area of study, or will use the principles employed to enhance their problem-solving abilities.
Chemistry 430H is designed for chemistry majors and is not cross-listed with biol 430. Hence, Chemistry majors in the honors program will have priority.
Seats will open as follows: Chemistry majors in honors with senior status,
Chemistry majors in honors with junior status, Chemistry majors BS-Biochem, Chemistry majors BA. Any additional seats (and there usually are very limited

CHEM 460H.001 | Intermediate Organic Chemistry
TR, 9:30 am - 10:45 am. Instructor(s): Simon Meek. Enrollment = 5.
Concurrent to CHEM 460 with increased emphasis on primary literature.

PREREQUISITE: CHEM 262 OR 262H.
TO REGISTER FOR CHEM 460H, YOU MUST BE REGISTERED FOR CHEM 460 FIRST. ONCE YOU ARE REGISTERED FOR CHEM 460, PLEASE EMAIL chemus@unc.edu REGARDING YOUR INTEREST IN REGISTERING FOR CHEM 460H.

Simon Meek is Associate Professor of Chemistry. Researchers in Dr. Meek's group are involved with the discovery, design, and development of new chiral catalysts and catalytic methods for chemical synthesis. They focus on developing practical and effective catalysts that enable the use of simple and

WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC). If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT PROCEDURES
Students may only enroll in one (1) First-Year Seminar OR (1) First-Year Launch during their time at UNC. Please note that First-Year Seminars and First-Year Launches do not have waitlists.

TITLE: Literature at the Edges of Empire

IDEAS IN ACTION GEN EDS: FC-AESTH, FC-PAST

COURSE DESCRIPTION
The Roman empire was massive, tri-continental, and multiethnic: at its height, it stretched from Northwestern Europe to the Near East and North Africa, and comprised countless nations, ethnicities, languages, and religions. Consequently its literature, far from being monolithic, is diverse and heterogeneous, and many of our most important Roman works come from the `fringes¿, authored by writers who had acutely experienced the effects of, and were in deep dialogue with, Roman imperialism and colonialism. In this class we will read writers from the edges of the Roman empire who produced a vast, wide-ranging body of work in numerous important genres: the novel, autobiography, gospels, tragedy, and philosophical literature. One of our major goals will be to

CLAS 241H.001 | Women in Ancient Rome
TR, 2:00 pm - 3:15 pm. Instructor(s): Sharon James. Enrollment = 12.
In this class, we will learn about the life of women in ancient Rome, beginning with this question: what do we mean when we say women in ancient Rome? We will focus on the treatment, both legal and social, of Roman women, by examining the visual depictions of women and women's lives as well as the literary evidence. We will cover about 800 years of history in this course.

CROSSLISTED WTIH WGST 241H

Professor James specializes in Roman comedy, Latin poetry, and women in ancient Greece and Rome. She has published many articles on these subjects, as well as a book on Roman love elegy (published in 2003); she is currently preparing a large-scale book on women in Greek and Roman New Comedy (the plays of

CLAS 415H.001 | Roman Law
MWF, 12:20 pm - 1:10 pm. Instructor(s): James Rives. Enrollment = 24.
This course combines a survey of the main areas of Roman law in their social and historical context with the close study of primary texts illustrating Roman law in practice, especially case studies from the writings of Roman legal experts; particular attention is given to the logic and application of ancient Roman legal thought and to its social and ethical implications.

I received my BA from Washington University in St. Louis in 1984 and my PhD from Stanford University in 1990. After teaching at Columbia University in New

TITLE: Communication, Culture, and Society

COURSE DESCRIPTION
This course introduces students to several primary areas of focus for social justice-oriented scholarship and activism. These areas include racial justice, labor and economic justice, gender and sexual justice, and environmental justice. The course will also introduce students to ways that these issues are studied in the Department of Communication at UNC, by paying particular attention to popular culture and public engagement as sites of struggles for social justice.

WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework

TITLE: Paying Attention: The Art of Documentary Filmmaking

IDEAS IN ACTION GEN EDS: FC-CREATE

COURSE DESCRIPTION
Paying attention to the world around us is foundational to our understanding of the people, behaviors, environments, and living species that co-exist alongside us. Attention fuels our curiosity, deepens our empathy, and invites us to step outside of ourselves. Representing what we pay attention to¿what we see and hear¿is the art and practice of documentary. At its essence, documentary is a ¿document¿ of what we observe and what we record. In this course, we will use video and sound recording along with the written word to document and then re-present what we are paying attention to. Throughout the course, students will strengthen their attention-paying capacities and learn how to refine their chosen methods of documentation. Class discussion, readings, film

TITLE: The Social Life of Things

IDEAS IN ACTION GEN EDS: FC-KNOWING

This first-year seminar invites students to learn about the world through objects. After all, we are surrounded by them. Our homes, offices, stores, and public spaces are chock full of things, but we rarely pay them much mind. Some things are mass-produced; others are handmade. Some we only use once; others we hold onto our entire lives. Some things are commodities, meaning that they can be bought and sold on a market; others are gifts, meaning that their value is determined socially and interpersonally rather than economically. What stories can these things tell us about the culture, economy, and politics of the societies that produce and consume them? What can we learn about ourselves by studying objects and their histories? Through a range of case studies, students will learn about how the production, distribution, consumption, and disposal of things structures and animates the worlds we live in.

TITLE: Fostering Civil Discourse: How to Reason Together for Common Good

IDEAS IN ACTION GEN EDS: COMMBEYOND, HI-PERFORM

COURSE DESCRIPTION
People across the political spectrum are finding it increasingly difficult to hold reasonable conversations with anyone outside their ideological echo chambers. Must that be the case? This course is founded on the belief that we can promote democratic values by fostering robust discursive practices guided by the promise of shared reasoning. The course will empower students to deliberate across a wide range of challenging issues, equipped with tools and perspectives rooted in the rhetorical tradition.

In order to actualize a more fair, just, and equitable society, it is essential that we hone an awareness of the political dimensions of technological systems and work toward the design of better ones.

The goal of this course is to foster such a critical technological literacy. It will cover "gig economy" platforms and labor relations, surveillance and policing algorithms, and the environmental impact of technological infrastructures.

GR1

In this course, we will learn about several key approaches to studying media audiences from the perspectives of both media industries and media researchers. We will learn about media effects research and its opposite, active audiences research. We will study how the media industries imagine, construct, count and court audiences as well as how the value of audiences has shifted within a converging and participatory media landscape. We will study how fan communities operate in ways that are both highly valued by media industries and also challenge media industry efforts to manage and monetize their audiences.

Environmental Advocacy
This seminar introduces students to the foundations of environmental communication and environmental advocacy from both a theoretical and practical perspective. We¿ll learn about the history of environmental thinking and activism, explore the social construction of nature through discourse and the media, as well as gain an understanding of the role of environmental sciences in public discourse, law, and politics.

Reserve Capacity: 23-OCT-2023 UG COMM Majors **Reserve Enrl Cap:** 15 **Reserve Enrl Tot:** 15

This course is for COMM majors only. Permission of the instructor required for non-COMM majors.

Detailed course description:
The purpose of Hate Speech is to expose students to the nature of hate in American life. As we attempt to understand the essential qualities of hate we will learn that hate is made possible through communication (sometimes in the form of hate speech) and human perception (sometimes in the forms of stereotypes and bias). We will learn that hatred is sustained through the imposition of racist, sexist, and heterosexist ideologies that privilege Whiteness, maleness, and heterosexuality. Sometimes these ideologies are explicitly understood by the people who use them. Sometimes these ideologies and the assumptions underlying them are only implicitly understood and we may be relatively unaware of their influence.

We will also learn that hate may also be resisted through communication. Students will learn how communication may serve to teach respect and tolerance,

This course has prerequisite requirements.

Class meetings may also be held in the following alternative locations: Swain Hall 106A and Swain Hall 200A.

Detailed course description:
This course is designed to provide a structured environment, instructor and peer feedback, along with production & postproduction resources in which to complete an advanced near-to-graduation media project. The project can be in narrative, documentary, experimental, or interactive, with a running time for

videos of no longer than 20 minutes. The course assumes the student has already taken a fair number of the post-COMM 230 production courses offered in the department.
Seniors only.
This course has classification (class year) restrictions.
Permission of instructor for nonmajors.
A capstone course for seniors who are on the COMM Media Production track, and who have completed significant preparatory coursework. COMM 230 and at least one 500-600 level production course are required. Interested students must apply in the Fall with a project to be considered for enrollment. Students in the course will complete an advanced media project in narrative, documentary, experimental, multi-media or audio.

This course is for Seniors only.

Course topic: Buff and Polish

The objective of this seminar/practicum is to provide students with an orientation to the process of finding employment in an academic setting, and to provide students with opportunities to develop the materials necessary to assist in that effort. While the focus is primarily on entry-level academic positions, such as Assistant Professor, materials developed as part of the course are applicable to applying for post-doctoral fellowships, "ABD" positions, and work in other settings (eg. governmental) requiring a Ph.D.

TITLE: Lux Libertas: On the Understanding and Handling of Light

COURSE DESCRIPTION
Light has figured centrally in human explanations and manipulations of the natural world: from creation narratives, to the Copernican Revolution, to the theory of relativity, to harvesting energy from sunlight, to shaping light inside phones and screens for the capture and display of images. The goal of this course is to bring students into an intellectual encounter with light, one that will provide a history of human understandings of light, experimental encounters with light in the laboratory, and orientations to theoretical paradigms that have resulted from the human manipulation of light. At its most broad, the course aims to introduce first year students to knowledge and matter-energy as things that we study, handle, and transform.

TITLE: Technology of Today and Tomorrow

IDEAS IN ACTION GEN EDS: FC-VALUES

COURSE DESCRIPTION
Do you want to be a future leader in our society? Perhaps an influencer or a CEO or even President? If yes, you¿ll be more successful if you effectively use technology. And you¿ll be a more effective user of technology if you better understand how the technology works under the hood. Each week, we¿ll consider a recent news headline and delve into the relevant technology behind the headline, from the use of ChatGPT, to self-driving cars, to a new blockbuster movie¿s special effects, to a social media platform¿s new feature. We¿ll explore how the technology works via interactive experiences, discussions, and presentations. The goal is for future leaders and conscientious citizens to gain useful intuition about how societally-relevant computing technologies work

COMP 283H.001 | Discrete Structures
MWF, 12:20 pm - 1:10 pm . Instructor(s): Jack Snoeyink. Enrollment = 24.

Underlying the many applications of computers in our daily life are discrete structures like Boolean logics, relations, finite state machines, graphs, and networks that have mathematical specifications. You can tell your parents that the primary purpose of this class is to introduce these discrete structures and the formal proof techniques that support the production, verification, and maintenance of correct software. In fact, many of these are familiar from puzzles and games: already in 1990 Super Mario World expects kids to immediately understand a finite state machine diagram¿
This is a language class: you will learn vocabulary and idioms of a language that is more precise and less ambiguous than the languages that we usually speak or write. With any new language, you may at first struggle to make yourself understood, but by frequent immersion and fearless practice you can become comfortable thinking and expressing yourself creatively in the language. Students pick up languages at different rates, so work to teach each other. All can gain fluency with effort and a willingness to make mistakes. And fluency will help all your computer science endeavors ¿ precise and unambiguous

Class Equivalents: COMP 380/380H
Reserve Capacity: 23-OCT-2023 Undergraduate Honors Majors **Reserve Enrl Cap:** 24 **Reserve Enrl Tot:** 24

Honors Carolina students can register themselves for SPRING 2024 online when their registration appointment begins.
Non-Honors students will be eligible to enroll beginning November 17 during open enrollment.
COMP 380H.001 | Introduction to Digital Culture
TR, 2:00 pm - 3:15 pm. Fred Brooks Room 331 Instructor(s): Tessa Nicholas. Enrollment = 24.
This course examines the nature, function, and effects of the Internet and Internet use in the context of an extended study of its history, considering key technologies, concepts, ideas, innovators, and historical and sociocultural influences. Significant reading, writing, research, and beginner-friendly, code-light web development and data science components. No previous programming or technical experience is required. This course is suitable for both CS majors and nonmajors.

Class Equivalents: DRAM 80/80H

This class will meet in DC (Dramatic Art Center) room105

WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC). If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT PROCEDURES
Students may only enroll in one (1) First-Year Seminar OR (1) First-Year Launch during their time at UNC. Please note that First-Year Seminars and

FOUNDATIONS IN STAGE COMBAT.
This special studies course explores how to safely find truthfulness in action and facility in expression while engaged in staged acts of violence. Focusing on three distinct forms of stage combat (unarmed, knife, and swordplay), the class presents a safe, consensual, and repeatable approach to ¿aggressive¿ physical storytelling. Safe stage combat techniques free the artist to focus on the acting craft and the effective telling of the physical narrative.

Before enrolling, please contact student services manager Taylor McDaniel ttmcdani@email.unc.edu

WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC). If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT PROCEDURES
Students may only enroll in one (1) First-Year Seminar OR (1) First-Year Launch during their time at UNC. Please note that First-Year Seminars and First-Year Launches do not have waitlists.

CMPL 280 Dr. Henry Veggian Spring 2024 Tues/Thurs 3:30-4:45

This course is dedicated to the genre of mystery cinema, with emphasis on film noir and its progeny in American cinema, with some occasional detours to other national traditions. The course will proceed chronologically through the history of cinema, in survey form. First it will examine early cinema of the silent era, then shift attention to the sound era during Hollywood¿s Golden Age. There, the influence of German expressionist cinema will be studied where it merges with the American mystery in modern cinema to shape film noir. We will then proceed to the post-war era, and shift our focus to the counter-culture and how it adapted earlier forms. We will examine the work of canonical directors such as Hawks, Huston, Altman, Polanski, the Coen Brothers and Paul Thomas Anderson, to name a few.
While primarily a film course, CMPL 280 will include tangents into other aspects of modern media history in order to explain how mystery cinema forms part of a media constellation. Students may also adopt inter-disciplinary methodologies in this regard, as we will discuss media other than film (including

WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC). If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT PROCEDURES
Students may only enroll in one (1) First-Year Seminar OR (1) First-Year Launch during their time at UNC. Please note that First-Year Seminars and First-Year Launches do not have waitlists.

ENGL	57H	001	12138	FYS FUTURE PERFECT	Lecture (In Person On Campus Learners)	3	A

Class Equivalents: ENGL 57/ENGL 57H
Reserve Capacity: 22-OCT-2023 UG FY-SEMINAR/LAUNCH + HONORS **Reserve Enrl Cap:** 24 **Reserve Enrl Tot:** 21

NOTE: Honors Carolina students can register themselves for SPRING 2023 online when their registration appointment begins.
Non-Honors students will be eligible to enroll beginning November 18 during open enrollment.
ENGL 057H.001 | Future Perfect
TR, 12:30 pm - 1:45 pm. Instructor(s): Matthew Taylor. Enrollment = 24.
What will our world look like in ten years? Fifty? One hundred? Will the future be a utopian paradise or a dystopian wasteland? Through a wide-ranging survey of popular science writing, novels, and films, this first year seminar will examine fictional and nonfictional attempts to imagine the future from the nineteenth century to the present. We will explore everything from futurology and transhumanism to warnings of imminent environmental collapse. Our focus will be less on assessing the accuracy of these predictions and more on determining what they tell us about the hopes and fears of the times in which they were made. The course will culminate in a short research paper on a future-oriented topic of your choosing.

FIRST YEAR STUDENTS ONLY.

ENGL 071H.001 | Healers and Patients
MWF, 11:15 am - 12:05 pm. Instructor(s): Kym Weed. Enrollment = 24.
When medical anthropologist Arthur Kleinman writes that ¿illness has meaning,¿ he reminds us that the human experience of being sick involves more than bodily symptoms. Moreover, the effects of illness and disability are rarely confined to one person. In this course, we will analyze a diverse collection of writers who have taken as their topic the human struggle to make sense of suffering and debility through a range of genres including fiction, non-fiction, graphic memoir, podcasts, and oral histories.
Divided into five units, the course will allow us to explore not just the medical, but also the personal, ethical, cultural, and political facets of illness from the perspectives of patients, healers, and families. Central texts will include /Ask Me About My Uterus/ by Abby Norman, /Black Man in a White Coat/ by Damon Tweedy, /Mom¿s Cancer/ by Brian Fies and /The Farewell/ directed by Lulu Wang. Additionally, students will explore a set of oral histories from the Stories to Save Lives project to learn more about the experiences of patients, healers, and families from across North Carolina.

This unique section of English 105 will explore composition and rhetoric in video games. We will explore forms of technical writing, cultural criticism, and sociological analysis across different types of games and mediums. Along the way, the class will generate questions of gamification, gameplay, and user design while contemplating our own writing and research practices.

Honors Carolina students can register themselves for SPRING 2024 online when their registration appointment begins.
Non-Honors students will be eligible to enroll beginning November 17 during open enrollment.
ENGL 132H.001 | Honors: Intro to Fiction Writing
MW, 10:10 am - 11:25 am. Instructor(s): Daniel Wallace. Enrollment = 15.
Writing intensive. Early short assignments emphasize elements of dramatic scene with subsequent written practice in point-of-view, dialogue, characterization, and refinement of style. Assigned short stories from textbook with in-depth analysis of technique, craft, and literary merit. Students will write and revise two full stories which will be duplicated for all class members and workshopped by instructor and class. The short stories will be approximately 10-15 pages long. Revision in lieu of final exam. The course is informal but stringent; students may be asked to write each class meeting. Vigorous class participation in workshop is expected. Required texts: This course (or ENGL 130) serves as a prerequisite for other courses in the fiction sequence of the creative writing program (ENGL 206, 406, 693H). Textbook: Seagull Reader, W. W. Norton.

FIRST YEAR HONORS CAROLINA STUDENTS ONLY

Honors Carolina students can register themselves for SPRING 2024 online when their registration appointment begins.
Non-Honors students will be eligible to enroll beginning November 17 during open enrollment.
ENGL 133H.001 | Honors: Intro to Poetry Writing
TR, 11:00 pm - 12:15 pm. Instructor(s): Michael McFee. Enrollment = 15.
This course will explore the many pleasures and challenges of writing good poetry. Our focus will be the regular writing and revising of your original poems, and the in-class workshopping of some of these poems, but we will also spend much time reading and discussing exemplary poems from the past and present, learning poetic terms and forms and techniques, listening to poems read aloud, and doing whatever else might help you become a better poet. Among the course requirements: several textbooks, to be read and discussed thoroughly; a midterm exam and a final "term poem"; other written exercises; a memorization and recitation assignment; and (most important of all) your writing of up to ten original poems, and your ongoing revisions of those poems. This is a fun and informative class that will help you think and write more clearly, more vividly, and more imaginatively.

INTENDED FOR FIRST-YEAR HONORS CAROLINA STUDENTS, BUT OPEN TO OTHERS, BY PERMISSION OF THE INSTRUCTOR.

21st Century Essay

Creative Nonfiction as a genre has exploded over the past decade because a variety of writers took risks with form, style, content, intent, and found new ways to communicate about modern life that differs greatly from fiction and poetry. The 21st Century Essay is unrestrained, mysterious, and explosive. Writers have challenged the traditional modes of nonfiction by working against the limitations of argumentative or strictly analytical structure with an eye toward our modern, discursive, fragmented, and elusive globalized world. Writers of the genre are of the most diverse and intersectional backgrounds in publishing. With a fearlessness that is revolutionary, they wrestle with culture, the self and memory, doubt, myth, history, technology, sex and identity. In this class we will read widely within essay as a genre¿a genre that is ingenious, strange, playful, timeless, and performed¿as well as write and consider our own work every week. The course will culminate in 2 large group workshops of long-form essays.

ENGL 219H.001 | The American Novel
TR, 11:00 am - 12:15 pm. Instructor(s): Sarah Boyd. Enrollment = 24.
This course traces the development of the American novel from the Early Republic ¿ 1790s ¿ to the novels of the modern era at mid-twentieth century. Key novelists ¿ and novels ¿ will be analyzed in chronological sequence, examining the formal and thematic developments of the novel from its joint inception with the founding and western expansion of the United States. Accordingly, the course will explore the relationship between writers, readers, and the conditions of publishing and the development of literary movements. In doing so, we will consider fiction¿s engagement with historic events and the changing of place of fiction in American culture over more than one hundred and sixty years. We will endeavor to assess their critical reception at the time they were writing and publishing as well as their importance to the critical development of American literature as we now understand it today.

At the close of the semester, students will have a deeper understanding of the historical development of the American novel as well as the social and

ENGL 221H.001 | The Night Optics of 20th & 21st Century U.S. Novels
MWF, 10:10 am - 11:00 am. Instructor(s): María DeGuzmán. Enrollment = 24.

This course examines major U.S. novels and their night optics. These novels of the night perform a deep questioning of the ¿American Dream¿ and the novelistic task of giving form to chaos and refiguring the social order. This course examines the intertwining legacies of the dark side of the Enlightenment, Gothicism, Romanticism, Naturalism, noir, existentialism, Gnosticism, and socio-political and aesthetic dissent. Required reading: F. Scott Fitzgerald¿s Tender is the Night (1934); Djuna Barnes¿s Nightwood (1936); William Styron¿s Lie Down in Darkness (1951), Ralph Ellison¿s Invisible Man (1952), John Rechy¿s City of Night (1963), Toni Morrison¿s Jazz (1992), Paul Auster¿s Oracle Night (2003), and Manuel Muñoz¿s What You See in the Dark (2011) in combination with ongoing reading of sections of Dr. DeGuzmán¿s Buenas Noches, American Culture: Latina/o Aesthetics of Night and Understanding John Rechy.

ENGL 225H.001 | Shakespeare
MWF, 1:25 pm - 2:15 pm. Instructor(s): Michael Gadaleto. Enrollment = 24.
How did genre (tragedy, comedy, romance, or history) shape the concerns of Shakespeare¿s plays? This class will read a range of Shakespeare¿s works to to help us investigate a series of questions about his culture and society. What, for example, do comedies reveal about controversies concerning marriage or the status of gender roles? What do tragedies say about religious and cultural perceptions of the origins of evil? What do they suggest about current theories of governance? We will situate the plays within their historical contexts by reading them alongside social histories and non-dramatic primary texts (such as handbooks, popular pamphlets, ballads, and diaries). For each play we will also review some of the current critical debates, sorting through the controversies to form interesting and relevant research questions.

ENGL 268H.001 | Medicine, Literature, and Culture

TR, 2:00 pm - 3:15 pm. Instructor(s): Matthew Taylor. Enrollment = 24.
"How is solving a crime like diagnosing an illness? Why do descriptions of diseases follow narrative patterns? What¿s behind the rhetoric of ¿battling¿ disease, and why are social problems often characterized as ¿ills,¿ ¿plagues,¿ and ¿cancers¿? How have notions of ¿health¿ and ¿normality¿ resulted in such things as forced sterilization and genocide? What are the cultural meanings associated with ¿life¿ and ¿death¿? What do the stories we create¿about disability and disease, about who (and what) has the power to heal, about the fear of death and desire for transcendence¿tell us about our culture, our history, and the experience of being human?

This course will provide an introduction to Health Humanities, a new area of study that combines methods and topics from literary studies, medicine, cultural studies, and anthropology. We¿ll read novels, screen films and television episodes, learn about illnesses and treatments, and hear expert speakers

Honors Carolina students can register themselves for SPRING 2024 online when their registration appointment begins.
Non-Honors students will be eligible to enroll beginning November 17 during open enrollment.
ENGL 337H.001 | The Romantic Revolution in the Arts
T, 2:00 pm - 5:00 pm. Instructor(s): Joseph Viscomi. Enrollment = 25.
This interdisciplinary course examines the technical and aesthetic revolutions in the fine arts of the English Romantic Period. It will discuss productions, experiments, and aesthetic theories of William Wordsworth, S. T. Coleridge, J. M. W. Turner, and William Blake, focusing on the developments of lyrical poetry, landscape painting, and original printmaking. We will pay special attention to the period's new ideas about nature, the sublime, picturesque travel, genius, originality, and social role of the artist. There will be a studio workshop in drawing landscapes in pen and ink according to 18th-century techniques and formulae and a workshop in printing facsimile plates from Blake¿s Songs of Innocence and of Experience. Knowledge of printmaking and painting is not required.

Honors Carolina students can register themselves for SPRING 2024 online when their registration appointment begins.
Non-Honors students will be eligible to enroll beginning November 17 during open enrollment.
ECON 325H.001 | Entrepreneurship: Principles and Practice
TR, 11:00 am - 12:15 pm. Instructor(s): Chris Mumford. Enrollment = 10.
The course is designed to help students turn an idea into an enterprise. We will execute a design sprint to reinforce the understanding of the ideation and validation process. Students develop high resolution ideation and marketing skills. We delve into classic strategy principles by applying them given new market and technology trends. Finally, we develop a street smart version of finance through cash flow forecasting and core fund raising techniques. By the end of class, students will be able to discover ideate, validate and accelerate ventures.
Grading will largely be determined by student effort. The class is taught mostly in a flipped classroom, group experiential learning environment. Class participation and being a solid group contributor are essential for grading success. The class will use tutorials, examples and templates extensively. Low stakes quizzes will be used as a recall tool. The primary communication tool is Slack.

Prerequisite: ECON 125

Meets in GA 0008 with non-honors ECON 325.

Required recitation on Tuesdays from 12:30pm - 1:30pm.

Non-Honors students will be eligible to enroll beginning November 17 during open enrollment.
ECON 420H.001 | Intermediate Macroeconomics
TR, 12:30 pm - 1:45 pm. Instructor(s): Christopher Roark. Enrollment = 24.
The course serves as an intermediate treatment of modern micro-founded macroeconomic models. There is particular attention on describing macroeconomic phenomenon and the impact or effects of monetary and fiscal policy. Students should also expect to analyze current trends and data in the macroeconomy using the toolsets developed in the course.
By the end of this course students should be able to:
1.) Construct and solve a model that matches several stylized facts about the macroeconomy
2.) Apply General Equilibrium analysis to a working model of the macroeconomy
3.) Evaluate data and media statements regarding shifts and changes to the working model

4.) Discuss monetary policy in the modern ample reserves environment

Class Description: How people are paid can make or break an organization. This course studies organizational economics, with a focus on how compensation

shapes work within organizations. Using a workhorse game theoretic model, case studies and recent empirical work in economics and management, students will learn how pay can help or hurt effort, teamwork, multitasking, and much more. This course will be useful for students interested in consulting, human resource analytics or starting their own company. A background in game theory is not required.
NOTE: This class is 3 credit hours. ConnectCarolina automatically defaults to 1 unit/hour, but you will need to manually change it to 3 during the enrollment process. Contact kcfinn@unc.edu if you need assistance.
Waitlists will be activated on November 6th.The Registrar's website (registrar.unc.edu/guide/waitlists/) explains that when a seat becomes available in the class, the person who's been on the waitlist the longest is automatically enrolled, provided they meet the eligibility criteria.

Attributes: PL- Physical and Life Science, IDEA - FY - First Year Seminar

WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC). If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT PROCEDURES
Students may only enroll in one (1) First-Year Seminar OR (1) First-Year Launch during their time at UNC. Please note that First-Year Seminars and First-Year Launches do not have waitlists.

Reserve Capacity: 03-NOV-2023 UG Freshman or FY Students **Reserve Enrl Cap:** 24 **Reserve Enrl Tot:** 3

WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC). If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT PROCEDURES
Students may only enroll in one (1) First-Year Seminar OR (1) First-Year Launch during their time at UNC. Please note that First-Year Seminars and First-Year Launches do not have waitlists.

TITLE: Investigating the Biodiversity Crisis: A Hands-On Approach

IDEAS IN ACTION GEN EDS: FC-QUANT or FC-NATSCI

COURSE DESCRIPTION
A global biodiversity crisis is unfolding: species are going extinct at an alarming rate and many species are experiencing population declines that will soon put them at risk of extinction. In this class, we will investigate the nature of the on-going biodiversity crisis, its causes, and its place in life¿s evolutionary history. Students will gain hands-on experience identifying biodiversity and working with biodiversity data. Students will also discuss and evaluate alternative solutions to biodiversity loss from ethical, religious, economic, social, and scientific perspectives.

TITLE: A View from Above: Using Drones to Solve Environmental Problems

IDEAS IN ACTION GEN EDS: FC-KNOWING, HI-SERVICE

COURSE DESCRIPTION
Students in this course will explore the ways scientists are using Unmanned Aircraft Systems (UAS, aka ¿drones¿) to view, record, and map our world for managing natural resources and solving environmental problems by gaining hands-on experience with this exciting new technology.

WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework

Water supply is a critical component of food and energy production, good health and sanitation. Yet globally, access to clean water is still not assured, even within developed nations like the United States. Following the leadership of the UN Declaration of Human Rights, an increasing number of countries are adopting the position that access to water is a human right. What barriers to nations and individuals have to guaranteeing water access? Given the critical nature of water to good health and nearly all of human economic activity, what constraints do people have to negotiate globally to maintain sufficient stocks of this crucial resource for the earth¿s population?

This course examines these questions. To do this we will use a variety of mediums: film, books, scientific research, lectures and discussions. We will endeavor to not only outline the constraints to and conflict over this increasingly limited resource, but also suggest some paths towards sustainable water use in the future. Each of you will also have the opportunity to investigate solutions to a particular water conflict of your choice.

Attributes: IDEA - FY - First Year Seminar

WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC). If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT PROCEDURES
Students may only enroll in one (1) First-Year Seminar OR (1) First-Year Launch during their time at UNC. Please note that First-Year Seminars and First-Year Launches do not have waitlists.

Seats are reserved for EXSS majors during the Fall and Spring semesters. Non-majors will want to look at taking this course in one of the summer sessions which are self-enrolling.
Please join the waitlist here on Connect Carolina during Wave 2 if you are interested in being enrolled in EXSS 275L.

YOUR SPOT ON THE WAIT LIST DOES NOT ASSOCIATE WITH YOU BEING GIVEN A SEAT IN THE COURSE.

The department will confirm that you are an EXSS major, and have completed EXSS 175 or EXSS 155 with a B or better. Ranking on the official waitlist is determined by the number of hours toward graduation (seniority), as well as terms here at UNC. You will be contacted sometime in December if you are given a

seat in the course, and will be manually enrolled then.

Please contact Lacey Singletary with questions (lsingle@email.unc.edu).

The purpose of this course is to provide the student with a structured, supervised practical experience in exercise and sport science professional settings. Students will be individually mentored by on-site supervisors who will be responsible for assigning and assessing meaningful work, as well as providing training, feedback, and opportunities for participation in organizational activities (i.e., meetings, events). Students will also receive guidance for professional development from their lead instructor in the form of in-class activities, focused assignments, and guest speakers.
This course is for Junior or Senior EXSS GENERAL Majors only (not SA or FP) with a GPA of 2.0 or above.

The purpose of this elective course is to enhance students¿ understandings about social and cultural dimensions of sport and exercise contexts. Through directed readings, classroom conversations, assignments/projects, and guest speakers, students in this course will learn how these sociocultural realities impact sport and exercise community programming, academic research, and industrial innovation.
This course is for Junior or Senior EXSS Majors only.

This course experience is designed for undergraduate students to provide course support to their peers. Specifically, this course provides opportunities for students to prepare, demonstrate, and consult with their peers via in-class and out-of-class activities. Additionally, students will gain an enhanced understanding of Exercise and Sport Science based content (based on the course they are assisting) with a lens towards explaining to less experienced students, gaining pedagogical knowledge and experience, and engaging in comprehensive, concise, and clear oral and written communication.

All LFIT classes will meet in Fetzer Gym A for the first day of class. You will hear a brief overview of what to expect in LFIT this semester, and break out into our group.

*You will not be doing any physical activity on the first day of class.
Students may take only one, one-credit Lifetime Fitness (LFIT) course during their career at Carolina.
Spaces have been reserved for first year and senior students. The restrictions will be removed on the LDOC of the current semester.
This course has an additional fee.

All LFIT classes will meet in Fetzer Gym A for the first day of class. You will hear a brief overview of what to expect in LFIT this semester and break out into our group.
*You will not be doing any physical activity on the first day of class.
Spaces have been reserved for first year and senior students. The restrictions will be removed on the LDOC of the semester.
Students may take only one, one-credit Lifetime Fitness (LFIT) course during their career at Carolina.
This course has an additional fee.

TITLE: Forests and People

IDEAS IN ACTION GEN EDS: FC-VALUES or FC-KNOWING

COURSE DESCRIPTION
Through collective exploration, students will deepen their understanding of the far-reaching impacts of forests on virtually every facet of our daily lives. By delving into how we are shaped by trees and how trees shape us, students in this course will learn about the diverse ways in which we use, value, and depend on forests. We cover global and domestic perspectives, art about trees, as well as the iconic trees that make our campus unique.

This course is intended as an upper division/graduate seminar devoted to the new topic of the Anthropocene and the ways in which capitalism and climate change have emerged therein. The first half of the course will focus on the relationship between the development of capitalism in the 16th century and the consolidation of the anthropocentric subject separated from nature. The second half of the seminar will focus on the social, cultural, political, and policy dimensions of anthropogenic climate change. The focus here will be on resistance led by Indigenous and autonomous populations and movements. We will ask critical questions about the ways in which climate change stems from particular ways of knowing and being, currently encompassed under the heading of universal ¿modernity.¿ Radical alternatives to capitalist modernity will be discussed including ¿commoning,¿ ¿anarchism,¿ and the ¿pluriverse¿.

We are living in an era of uncertainties. However, this course departs from the premise that uncertainty is a bad thing. In fact, it provides opportunities to re-evaluate, elaborate and create other concepts and perspectives about the relationship between theory and the politics of change. Uncertainty poses the possibility of practices and forms of knowing that are more dynamic, reflexive and multiple -- eschewing the universalizing, anthropocentric, and colonizing tendencies of the dominant epistemological frameworks under-girding Liberal, Marxist, poststructuralist, and most critical visions available in the academy at present. This course will explore a variety of practices and imaginaries currently being elaborated and developed by social movements and other social actors engaged in social change work. **In particular, we explore the work of current projects that can be considered to fall into this non-traditional vision of social change. We will work together to create a resource tool for others grappling with this time and the larger period of crisis and re-orientation the present moment is a part of.

Sound Studies: Sound Studies is a burgeoning ¿field¿, an interdisciplinary space, a conversation variously about mediation, circulation, body, voice, and listening; about aesthetics and technological innovation; about mobility, coloniality, and struggle; about property, rights, and creativity; about senses, subjects, history, performance and experience; about experimentation and registers of representation; about publics and ecologies. This seminar tracks one strand of the conversation for its contributions to the interdisciplinary study of sound. Topics include jazz, contemporary Japanese noise music, European

Baroque music, Arabic maqam, hip-hop and raga-based music of Sound and Central Asia. Special emphasis will be placed on music as an ontological force that joins humans with other-than-human entities and consolidates them against other ontological worlds.

Course Title: Taiwan, Hong Kong, Xinjiang, and Xi Jinping's China

Taiwan, Hong Kong and Xinjiang represent three different challenges to the objective of national unification championed by Xi Jinping, the current President of the People¿s Republic of China (PRC). Each of these places has its own history and specificities that demand different strategies and approaches from the PRC government in its attempts to accomplish its stated goals. In this class we will explore the past, present and future of these three different cases and how these places evolved in recent decades, and how their predicament might affect not only Xi¿s ¿Chinese Dream¿ and the trajectory of the People¿s Republic, but also impact global affairs and our understanding of political subjectivity, identity, colonization and nation-building.

GLBL 692H 001 5312 HONORS IN GLBL Lecture 3 A
(In Person On Campus Learners)
Bldg: Stone Center **Room:** 0200 **Days:** Tu **Time:** 14:00 - 16:30
INST 100 **Instructor:** Weiler,Jonathan D.
Class Enrl Cap: 15 **Class Enrl Tot:** 12 **Class Wait Cap:** 999 **Class Wait Tot:** 0 **Class Min Enrl:** 0
GR1
Attributes: E6- Mentored Research, IDEA - Research and Discovery, Research Intensive

Course restricted to second semester Global Studies senior honors thesis students.

GLBL 700 001 9159 INTRO TO GLOBAL STUDIES Lecture 3 A
(In Person On Campus Learners)
Bldg: Dey Hall **Room:** 0205 **Days:** Tu **Time:** 14:00 - 16:45
TA 100 **Instructor:** OSTERWEIL,MICHAL
Class Enrl Cap: 15 **Class Enrl Tot:** 16 **Class Wait Cap:** 999 **Class Wait Tot:** 0 **Class Min Enrl:** 0
GR3

This course will introduce students to current interdisciplinary theoretical approaches to Global Studies and examine the primary topics of contemporary research relating to the rise of a complex but increasingly integrated world society.

GLBL 710 001 5415 MONITORING AND EVALUATION Lecture 2 A
(In Person On Campus + Remote)
Bldg: Woollen Gym **Room:** 0302 **Days:** F **Time:** 12:20 - 15:20
INST 100 **Instructor:** Salmorbekova,Zumrat Kasymjanovna

Class Enrl Cap: 22 **Class Enrl Tot:** 6 **Class Wait Cap:** 999 **Class Wait Tot:** 0 **Class Min Enrl:** 0

GR3

Required course for second-year Rotary Fellows, but non-Rotary graduate students are allowed to take the course.

For information about course content, please contact the instructor of record. To be enrolled in the class, please contact Kayla McManus-Viana at kmviana@ad.unc.edu.

GLBL 730 001 11953 IDENTITIES & TRANSITIONS Lecture 3 A
(In Person On Campus Learners)
Bldg: Phillips **Room:** 0301 **Days:** W **Time:** 14:30 - 17:15
INST 100 **Instructor:** ROBERTSON,GRAEME B

Class Enrl Cap: 15 **Class Enrl Tot:** 5 **Class Wait Cap:** 999 **Class Wait Tot:** 0 **Class Min Enrl:** 0

GR3

Required course for REEES concentration students in the Global Studies MA program. Interdisciplinary course focusing on the variety of problems encountered by the societies of East European countries and successor states of the former Soviet Union in their transition from communism to democracy.

GLBL 890 001 9963 SPECIAL TOPICS Lecture 1 - 3 A
(In Person On Campus Learners)
Bldg: Greenlaw **Room:** 0304 **Days:** F **Time:** 13:25 - 15:55
INST 100 **Instructor:** JOHNSON,ERICA

Class Enrl Cap: 24 **Class Enrl Tot:** 3 **Class Wait Cap:** 999 **Class Wait Tot:** 0 **Class Min Enrl:** 0

WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC). If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT PROCEDURES
Students may only enroll in one (1) First-Year Seminar OR (1) First-Year Launch during their time at UNC. Please note that First-Year Seminars and First-Year Launches do not have waitlists.

TITLE: Language, Migration, Identity

IDEAS IN ACTION GEN EDS: FC-AESTH or FC-GLOBAL

COURSE DESCRIPTION
This course focuses on connections between language, histories of migration, and processes of identity formation as presented in literature, films, and artworks by authors/filmmakers/artists in Germany who have backgrounds in other cultures. Germany is the economic powerhouse of Europe, but it has long struggled with the question of how to define its postwar identity. In addition to readings by authors with Japanese, Eastern-European, Jewish, Turkish, and African backgrounds in Germany, we will also learn about community engagement with immigrant and refugee communities here at home through the Town of Chapel Hill¿s Language Access Program and the New Roots Oral History Project at UNC Chapel Hill. Ultimately, this course offers students the chance to grapple with

Attributes: IDEA - Engagement with the Human Past, IDEA - FY - First Year Seminar

WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC). If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT PROCEDURES
Students may only enroll in one (1) First-Year Seminar OR (1) First-Year Launch during their time at UNC.

TITLE: Global History of Food (HIST 89.001)

COURSE DESCRIPTION
What does it mean to study food history, and how do we approach it from a global perspective? The world of food (and the food of the world) is a huge subject, and the focus in this class will be on historical texts and topics (as opposed to contemporary food issues), and on global examples (with an emphasis on non-Western regions, including Asia, Latin America, Africa, the Middle East). Class topics will center on three major themes: Food as Identity (Nation, Gender, Memory, Diaspora), Food as Value (Taste, Commodity, Feasting, Famine); Food in its Modern Forms (Industrialization, Consumption, Globalization). The course emphasis will be on giving students the opportunity to practice fundamental skills of historical methodology (written primary and secondary source analysis), and using what they have learned for a creative final project presentation, based on an oral history interview.

TITLE: Truth and Reconciliation in South Africa (HIST 89.002)

COURSE DESCRIPTION
How do countries overcome histories of racial injustice, inequality, and violence? What role can history play in promoting reconciliation? In 1994, South Africa embarked upon an experiment to answer these questions. The centerpiece of South African efforts was the Truth and Reconciliation Commission (TRC). From 1995-2002, TRC appointees did research and interviewed thousands of South Africans to uncover a hidden history of apartheid-era violence in the hope that truth would bring about reconciliation. South Africans still debate whether the TRC met its aims, but the model of the TRC has been emulated around the world since. This course will examine the significance of the TRC in the longer history of transitional justice from the end of World War II to the present. Students will conduct historical research, whether about South Africa or another country, in order to propose their own plans for a truth commission.

HIST 283H.001 | Chairman Mao's China in World History
MW, 3:35 pm - 4:50 pm. Instructor(s): Michael Tsin. Enrollment = 24.

In the last few years there have been many reports on how Maoism is making a comeback in China, an assertion that often draws on a rather crude comparison between the country¿s founding leader, Mao Zedong, and its current president, Xi Jinping. Yet, at the same time, commentators are also often quick to emphasize that in many ways the China of today is virtually unrecognizable from the country once ruled by Mao. Indeed, it is common to portray the early years of the People¿s Republic of China (PRC) ¿ from 1949 to the late 1970s ¿ as a period characterized by disastrous policies and China¿s isolation from the rest of the world. China only became a major player on the world stage, we are often told, when it rejoined the global order from the ¿reform era¿ of the 1980s onwards. From that perspective, then, contemporary China is a clear departure from its Maoist predecessor. How are we to reconcile these two seemingly contradictory portrayals of China nowadays?

Non-Honors students will be eligible to enroll beginning November 17 during open enrollment.
HIST 315H.001 | Nation-Building in Latin America
TR, 12:30 pm - 1:45 pm. Instructor(s): Cyntha Radding. Enrollment = 24.
History 315H, ¿Nation-Building in Latin America,¿ focuses on the major debates that have arisen in the past and in our own time over citizenship and the nation-state in the multi-ethnic and culturally complex societies of the Americas. It explores history and memory around the issues of human rights, gender, enslavement and emancipation; Indigenous peoples; religion and secular society, territory, and the nation-state. Class time will combine short lectures with discussions that weave together past and present, including Indigenous protests of the twentieth century, relating to the tumultuous social movements that we witness today. The fraught presidential elections of recent times in the U.S., Brazil, and Ecuador, Congressional stalemate, renewed awareness of social and economic inequalities, and the deep roots of violence in the republics of both North and South America make the question of nation-making especially urgent. Readings and class discussions will center on primary sources in different media, including historical texts, literature, art, film, and music. As an honors course, students will have the opportunity to carry out their own research on topics relating to nation-building and citizenship.

History 398-001: Life and Times of Che Guevara

This seminar examines the life and times of Ernesto Che Guevara, one of the most iconic and controversial revolutionary figures of the 20th century. In examining mid-twentieth century Latin American politics through the lens of this guerrilla fighter, this seminar explores how the course of Latin American history shaped Guevara, and how, in turn, Guevara shaped the course of Latin American history.

HIST 398-002: The 1968 Years: Ideologies and Practices of Liberation

Occupy activists were not the first to believe that another world is possible. This course will examine a diversity of individuals and movements which sought to bring these worlds into existence during the long 1968, extending a half-dozen years before and after 1968. Students will further our understanding of this period by researching and writing a 20-25-page paper on a subject of their choice. There are no geographic limitations on subject matter for your research papers. You can consider events in the United States, France, Czechoslovakia, Poland, Canada, Mexico, South Africa, China, and elsewhere. The course is designed to encourage a diversity of research subjects and comparative analysis. There are many individuals and groups whose experiences and the interpretations they and others gave to them are quite revealing. Workers, gays, women, ecologists, anti-war activists, soldiers, prison activists, people of color, libertarians, clergy, etc., pursued liberation struggles and there is much research to be done on them. These individuals and groups had a global imagination. Actions elsewhere provided motivation and support. Many during the long 1968 acted locally (or nationally), but an

History 398-004: Environmental History in Global Perspective

Global warming? Hurricanes and floods, destructive fires, and crises of food security. These are critical issues of human rights and the changing forces of our natural world.

This capstone research seminar provides students with the experience of planning and carrying out their own research projects, exploring different kinds of sources, and opening discussions on a variety of topics that are central to present-day environmental issues and the history of nature and human society on our planet. Its geographic focus includes four major world regions: North America, Latin America, Africa, and South Asia. Environmental history helps us understand changes in the land as well as issues of survival, sustainability, conflict, and cooperation among different peoples, power brokers, and economic sectors in society. We shall explore the ecological and social consequences of climate change, the problem of communal resource use and management in

HIST 398-005: The Great Depression

When writer Richard Wright wrote in the 1930s about his state of ¿hunger,¿ he was describing both the physical hunger of hard economic times and his broader ambition to change himself and American society. This course will assess the imagined and real possibilities for change during the Depression, evaluate New Deal reforms, and address the legacy Depression-era Americans made on institutions and succeeding generations. It will do so by interrogating an array of interdisciplinary primary and secondary sources. Weekly topics will include the expansion of the federal government, the rise of an industrial labor movement, the response of businesses, the evolution of African American protest, musical and artistic production that reshaped popular culture, and the paradox of new gender roles alongside stricter gender norms. The course will conclude with a look at the decades that followed, charting how the Depression decade impacted the 1960s generation and beyond.

HIST 488H.001 | Global Intellectual History
M, 2:30 pm - 5:00 pm. Instructor(s): Cemil Aydin. Enrollment = 24.
This seminar introduces the new field of global intellectual history. It studies the global circulation, exchange, translation, reception, and adaptation of political, social, and cultural ideas. We examine the condition under which ideas travel and ask whether diffusionist approaches account for the learning process in which intellectuals engage. After considering systems of knowledge in Asia, Africa, and the Americas, the seminar explores reactions to European empire since the fifteenth century. Themes include (de)coloniality, modernity, development, conceptions of nationality, race, and civilizations.

Cemil Aydin is Professor of History at the University of North Carolina-Chapel Hill. He studied at Bo¿aziçi University, ¿stanbul University, and the

University of Tokyo before receiving his PhD from Harvard University in 2002 in the fields of history and Middle Eastern studies. He was an Academy Scholar at the Harvard Academy for International and Area Studies, and a post-doctoral fellow at Princeton University¿s Department of Near Eastern Studies. His

HIST 510H.001 | Human Rights in the Modern World
MW, 4:00 pm - 5:15 pm. Instructor(s): Michael Morgan. Enrollment = 24.
Today, the language of human rights is almost universal. It is fundamental to the way that we understand justice both at home and, especially, abroad. But this was not always the case. Ideas of human rights changed over time, gaining power as a result of political, intellectual, and social developments worldwide. This course looks at the international history of human rights from the Enlightenment to the present and considers how human rights ideas first emerged, how they evolved, and how they became so influential.

NO FIRST YEAR STUDENTS. IT IS RECOMMENDED FOR STUDENTS TO HAVE TAKEN AT LEAST ONE PRIOR HISTORY COURSE.

Michael Morgan specializes in modern international and global history. His first book, The Final Act: The Helsinki Accords and the Transformation of the

HNRS 089.001 | Medicine and Narrative: Writing COVID / Writing Us
M, 2:00 pm - 4:30 pm. Instructor(s): Terry Holt. Enrollment = 20.
A workshop in autobiographical and creative short story, focusing on the complex connections between story-telling, interpretive skill, and the practice of medicine. Students will write and present autobiographical and and creative short stories about illness and medical care; the seminar will meet weekly to discuss these stories, attempting to identify and articulate the key issues each story expresses about what it means to be sick, what it might mean to take care of others in their illness. The writing and (especially) interpretive skills acquired in this workshop are directly valuable to anyone contemplating a career in medicine, but are equally valuable to anyone who might at some point encounter (in themselves or in someone they care for) the trauma of illness. In addition to the weekly workshop, participants will have one-on-one conferences with the instructor (himself an MD with an international reputation as a writer). A semester-long journal, focusing on the reverberations of the pandemic on the writer's daily (actual and interior) life, will form the basis for a final project, which may (at student option) be in the form of written narrative, an audio composition, or a film, composed using the tools available at the
